Kichere Magubu

I am an aspiring Data Scientist with a dedicated and results-driven approach to data analysis. Proficient in statistical analysis, Python, R, SQL, and Excel, I bring a diverse skill set to processing and analyzing extensive datasets. My hands-on experience extends to cleaning and deriving insights, and my effective communication skills enable clear conveyance of complex findings to diverse audiences. Eager to learn and apply cutting-edge data technologies to enhance firm value, I am committed to continuous skill development. Ready to contribute my analytical expertise, I aim to drive data-driven strategies and facilitate informed decision-making for your organization.

Professional Working Experience

WAMA-Nakayama Secondary School, Volunteer Mathematics Teacher (Sept-2019 -- Oct-2019)
YouTube Channel, Teaching YouTube (Aug 2019 - Present)

Education

Eastern Africa Statistical Training Centre, Bachelor of Degree in Data Science (2022 -- 2025)
Kibiti Secondary School, Advanced level (2017-- 2019) , Division One
Mara Secondary School, Ordinary level (2013-2016), Division One

Awards and Honors

Academic Excellence in Advanced Mathematics, Kibiti Secondary School (2017-2019)
Excellence in teaching Mathematics as a Volunteer teacher, WAMA-Nakayama Secondary School (Sept- Oct) 2019

Certificates

Advanced SQL, Great Learning (Dec-2023)
DML Statements, Great Learning (Dec-2023)
SQL for Data Science, Great Learning (Dec-2023)
SQL Projects for Beginners, Great Learning (Oct-2023)
Jupyter Notebook, Great Learning (Sept-2023)

Projects

HackerRank SQL Challenges

In my professional journey, I undertook a comprehensive project focused on mastering SQL through HackerRank challenges. This initiative involved tackling challenges of varying difficulty levels, ranging from easy to medium and challenging ones. Leveraging my expertise in MySQL, I executed these solutions in a dynamic and real-world environment, ensuring a practical application of theoretical knowledge. To enhance the learning experience, I compiled and documented the solutions along with helpful resources and references on my GitHub repository. This not only showcased my proficiency in SQL but also demonstrated my ability to tackle complex problems systematically and provided a valuable open-source resource for ongoing skill development.
